## TRANSACTIONS NAST PHL Ethical Guidelines for Authors

The National Academy of Science and Technology Philippines, the publisher of Transactions NAST PHL, issued a statement on the Ethical Principles and Guidelines for Filipino Scientists in July 2009 (<a href="http://www.nast.ph/images/pdf%20files/Ethical%20Guidelines/epgfs.pdf">http://www.nast.ph/images/pdf%20files/Ethical%20Guidelines/epgfs.pdf</a> ). This statement has been adopted by Transactions NAST PHL as ethical guidelines for contributing authors.

The statement, which may be directed to science researchers in general, "articulates the general principles of ethical conduct in scientific work and all its aspects; ...should guide all scientists in their various roles and functions in the scientific and academic community, and... society, including research, publication and other forms of public communication, teaching and mentoring, among others...In the long term, NAST PHL hopes that this statement of ethical principles will guide ...scientists as they strive to maintain the highest levels of ethical and professional behaviors as they face new forms of ethical dilemmas that arise in today's more complex scientific environment".

The ethical principles and guidelines cover: (a) following ethical practices; (b) ethical use of science; (c) conflict of interest; (d) intellectual honesty; (e) weighing the benefits of science visa-vis potential harm; (f) commitment to professional development as scientists; (g) development of students and other stakeholders, and (h) advocacy for scientific approaches.

## Transactions NAST PHL, therefore, asks authors to consider the following guidelines when contributing to this journal:

- Authorship: Authorship should be limited to those who have contributed <u>substantially</u> to any of the following: formation or formulation of the concept of the study, design, experimentation, interpretation or analysis of the study. The contribution of each of the authors will be declared at the end of the paper.
- 2) Originality and intellectual honesty: Authors should make certain that their work is original, should cite findings of other authors, and should not plagiarize or copy the work of other research reports whether published or unpublished.
- 3) Conflicts of/competing interest: Authors must disclose all relationships that could be viewed as presenting a potential conflict of or competing interest.
- 4) Ethical permits: Ethical permits for researches using human or animal subjects, involving indigenous peoples or their biological and cultural assets need to be declared upon submission of the paper.
- 5) Possible biosafety and biohazard hazards: Must be declared and proof of compliance provided.
- 6) Exclusive submission and non-redundancy of paper: The paper should be exclusively submitted to this journal and not to other journals at the same time. Authors should also not publish essentially the same research in different journals.
